Socal Roc

The Mad Max Assault Vehicle is designed to teach you all 8 basic modeling techniques:

- 1. Assembling and Modifying Primitives
- 2. Scattering
- 3. Lathing
- 4. Box Medeling
- 5. Booleans
- 6. Lofting
- 7. Extruding
- 8. Rendering Splines

Each technique is used in one or more of the basic elements of the vehicle:

- 1. Tires
- 2. Rims
- 3. Axles
- 4. Frame
- 5. Seats
- 6. Engine
- 7. Shocks
- 8. Body
- 9. Steering wheel

All vehicles must have all nine elements.
