

This sculpt is an exercise in anatomy\*. Muscles are defined from one another by deep “cuts” inbetween.

# Batman

1. Begin with covering the armature with a thin layer (1/4 inch) of clay
2. Once the armature is covered, begin sculpting.
3. Batman is “Bilaterally Symmetrical” (one side is the mirror of the other) therefore your best method is to sculpt both sides at the same time. Don’t let one side get far ahead of the other.

\* Refer to the anatomical diagrams on the classroom walls and handouts
