

3D Modeling & Animation

Box Modeling - Rim

1. The sequence below illustrates the development of the rim.

- Sub-Object processes used include:
- a. Selecting Multiple Polygons
 - b. Bridging
 - c. Insetting
 - d. Beveling
 - e. Selecting Edges and Connecting

2. The tire is created using the Lathing Method.

3. Tread is applied as a Bump Map with cylindrical UVW Map.

Tread Designs Created in Illustrator
